

WELCOME TO THE 5th GRADE SUMMER READING ADVENTURE

Your book assignment will be to read 2 Accelerated Reader books on your grade level (4th or 5th) over the summer and complete the summary sheet on the back of this page.

You will take an A.R. test when you return in August. The library has excellent ideas for 5th graders. You can also check for a very complete list of books on-line.

SUMMER MATH: You will do IXL on line over the summer and review 4th gr. math skills. I am suggesting a total of 500 minutes over a ten week period.

Completing this summer program will reinforce learned skills, preparing students for the 5th grade school year.
